

**Revosys Inc. in Boston, Massachusetts has launched plans to implement Payment Processing and Digital Video Recording in a number of their In-Taxi and Restaurant Kiosk solutions.**

**BOSTON, MA, December 16<sup>th</sup>, 2011** – Revosys Inc. announced the implementation of In-Taxi Payment Processing and Digital Video Recording for the upcoming 'Interactive V5' In-Taxi advertising system for the transportation and hospitality markets today.

The Revosys Interactive V5 allows credit card and debit card processing for swift and effortless payments. The Revosys payment processing solution offers an all-in-one system so there is no need for an external pin pad or additional credit card terminals. Never again lose valuable customers due to unreliable credit card processing systems. The new 'Interactive V5' provides a convenient way for taxi drivers and fleets to generate their full income potential.

The Interactive V5 In-Taxi system features a PCI PTS 3.0 approved Secure Touch Screen for PIN DEBIT entry. The Revosys V5 Interactive can process traditional Magnetic Stripe Cards (Triple DES Secure), Smart Cards (VISA, M/Chip-MasterCard, American Express, JCB) and Contactless payments as well as NFC (Near Field Communication) for Contactless Cards and Cell Phones equipped with Contactless Payment capability. The Revosys V5 sets a new World Standard for In-Taxi Infotainment, Security & Payment Processing.

The Revosys Interactive V5 provides peace-of-mind with its latest Digital Video Recording feature. This integrated surveillance system records a live video stream from you taxi cab, bus, train, or vehicle. The Revosys Digital Video Recording Security Surveillance all-in-one system is designed as a crime-prevention tool, but in the event that a crime does occur inside the taxi, the video proof is recorded. At that time the administrator can access the taxi's video stream from anywhere in the world (via CDMA, 3G or 4G wireless network).

Revosys infotainment solutions come with a full one year warranty & are assembled in the USA.
